

However, these advances have not yet eradicated the devastating consequences of heart disease, which remains the leading cause of death in the United States today. American men and women still suffer about 1.25 million heart attacks each year. About 50 million Americans still have high blood pressure—and uncontrolled high blood pressure is a major cause of stroke. Virtually every American has grieved for a relative or friend debilitated or killed by a cardiovascular disease or stroke.

In recognition of the need for all of us to become involved in the ongoing fight against cardiovascular diseases, the Congress, by Joint Resolution approved December 30, 1963 (77 Stat. 843; 36 U.S.C. 169b), has requested that the President issue an annual proclamation designating February as “American Heart Month.”

Now, Therefore, I, William J. Clinton, President of the United States of America, do hereby proclaim the month of February 1994 as American Heart Month. I invite the Governors of the States, the Commonwealth of Puerto Rico, officials of other areas subject to the jurisdiction of the United States, and the American people to join me in reaffirming our commitment to combating cardiovascular diseases and stroke.

In Witness Whereof, I have hereunto set my hand this third day of February, in the year of our Lord nineteen hundred and ninety-four, and of the Independence of the United States of America the two hundred and eighteenth.

William J. Clinton

Proclamation 6649—National Women and Girls in Sports Day, 1994

February 3, 1994

By the President of the United States of America

A Proclamation

The inspiring story of Wilma Rudolph is among our most outstanding examples of the courage of women in sports. Wilma Rudolph literally sprinted onto the world stage during the 1960 Olympics, becoming the first American woman to win three gold medals in track and field competition. What had transpired in her life before her great victory in Rome was perhaps even more astounding. The twentieth of twenty-two children, Wilma was born near Clarksville, Tennessee, weighing only 4-½ pounds. At the age of four, she was stricken with pneumonia, chicken pox, and polio, which left her crippled and with little hope of ever walking again. Through sheer determination and the love and support of family and coaches, Rudolph became an athlete of enormous talent and skill. However, hers was not only a personal victory. She was one of the first major role models for both Black and female athletes, and her unprecedented success caused gender barriers to be broken in previously all-male track and field events, like the Penn Relays.

As we celebrate the ability and commitment of women and girls in sports, we recognize that the life of Wilma Rudolph carries an important lesson for all of us. This stunning athletic sprinter, who raced like the wind, reminds us that women have long delighted in the thrill of athletic competition. They have demonstrated their versatility and have tested the limits of physical mastery and endurance.

With the adoption of the Education Amendments of 1972, American law offered women in colleges and universities the hope of enjoying the same governmental support that men's sports had always enjoyed. Title IX of that Act requires that those institutions

receiving government funding provide equitable athletic programs for women. But even as we remember the passage of this historic legislation, we realize that true equality in the world of sports has not yet come. By applying the same virtues that make a successful athlete—commitment, spirit, and teamwork—all of us can play a role in providing women and girls the opportunities they deserve.

Wilma Rudolph has spent her lifetime trying to share what it has meant to be a woman in the world of sports, so that other young women have a chance to reach their dreams. On this day, let us emulate this goal—to encourage all women and girls to fulfill their true potential in any sport they choose. Let us hope that they, too, will enjoy the incomparable feeling of the wind at their backs.

The Congress, by Public Law 102-557, has designated February 3, 1994, as “National Women and Girls in Sports Day” and has authorized and requested the President to issue a proclamation in observance of this day.

Now, Therefore, I, William J. Clinton, President of the United States of America, do hereby proclaim February 3, 1994, as National Women and Girls in Sports Day. I urge all Americans to observe this day with appropriate ceremonies and activities.

In Witness Whereof, I have hereunto set my hand this third day of February, in the year of our Lord nineteen hundred and ninety-four, and of the Independence of the United States of America the two hundred and eighteenth.

William J. Clinton

**Letter to Congressional Leaders
Transmitting a Report on
Implementation of the Privacy Act
February 3, 1994**

Dear Mr. Speaker: (Dear Mr. President:)

I am pleased to forward the enclosed report on the Federal agencies’ implementa-

tion of the Privacy Act of 1974, as amended (5 U.S.C. 552a). The report covers calendar years 1990 and 1991.

In addition to the data required to be reported by the statute, the report also describes agencies’ efforts in training their employees to carry out the provisions of the Privacy Act responsibly and reliably.

While agencies continue to meet their responsibilities under the Act, they are becoming increasingly concerned about how the Act’s provisions will work in a computerized environment. A challenge for the years ahead will be to harmonize the provisions of the Privacy Act with the technologies that are now coming into play.

Sincerely,

William J. Clinton

NOTE: Identical letters were sent to Thomas S. Foley, Speaker of the House of Representatives, and Robert C. Byrd, President pro tempore of the Senate.

**Message to the Congress
Transmitting the Great Egg Harbor
Study**

February 3, 1994

To the Congress of the United States:

I take pleasure in transmitting the enclosed report on the Great Egg Harbor River in the State of New Jersey. The report is in response to the provisions of the Wild and Scenic Rivers Act, Public Law 90-542, as amended. The Great Egg Harbor Study was authorized by Public Law 99-590, approved on October 30, 1986.

The study of the Great Egg Harbor River was conducted by a task force made up of representatives of affected municipalities, State and Federal agencies, organizations with river-related interests, and local residents under the leadership of the National Park Service. The National Park Service, together with the task force, identified the outstandingly remarkable resources within the study area, analyzed existing levels of protection for these values, investigated major issues and public concerns, assessed the attitude of riparian landowners, reviewed and analyzed the impact of existing and potential
